-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

**Period for Reply**

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133).
- Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

**Status**

- 1) ☒ Responsive to communication(s) filed on 10 March 2003.
- 2a) ☐ This action is **FINAL**. 2b) ☒ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

## DETAILED ACTION

### *Claim Rejections - 35 USC § 103*

1. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

2. Claims 35 and 2,3,9,17-20,25-28,30-31 are rejected under 35 U.S.C. 103(a) as being unpatentable over Lin (US 5,715,064) in view of Yamane et al. (5,523,843). Lin discloses first and second (plurality) of stages (102)(104), a first measurement system (120) capable of emitting a measurement beam to each of first and second stages (Fig. 1A, 1C), a second system (120') with second measurement range partially overlapping (both y-range) the first measurement range, and a control system to correct measurement results (Yamane) of the first and second systems. It would have been obvious to one of ordinary skill in the art to not only monitor yaw (rotation) as disclosed in Lin, but further to correct for it as in Yamane, motivation for which would have been correcting yaw rotation and mirror surface flaws (Yamane col. 2 lines 20-24).
3. Claims 36-42 and 32-34 are rejected under 35 U.S.C. 103(a) as being unpatentable over Lin in view of Yamane et al. as applied to independent claims 35 and 2 above, further in view of Miyazaki et al. (4,984,891). As to claims 39-42, note that x and y designations may be arbitrarily chosen along scanning or stepping axes, for motivation of adapting to specifics of alternate design footprints/rearrangements. As to claims 36-38 and 32-34, note that Lin discloses alternate embodiments including both biaxial x- and y-measuring systems, further for motivation of monitoring wafer rotation with (combinations of) at least 3 beams (col. 5 lines 24-25), and it

would have been obvious to one of ordinary skill in the art to modify any or all of the multiple biaxial beams with secondary measuring correction system as taught by Yamane and/or Miyazaki et al., for motivation of monitoring/correcting for wafer rotations.

### ***Conclusion***

Any inquiry concerning this communication or earlier communications from the examiner can be directed to Phil Natividad whose telephone number is 703-306-5944. The examiner can normally be reached on Tuesday through Friday and alternating Mondays; and supervising patent examiner Frank G. Font can be reached at 703-308-4881.

In view of delays in mail delivery in recent days, we at the USPTO would like to encourage you to communicate with the USPTO via facsimile. Facsimile transmissions may be used for correspondence as set forth in 37 CFR 1.6 such as: amendments, petitions for extension of time, authorization to charge a deposit account, an IDS, terminal disclaimers, a notice of appeal, an appeal brief, CPAs under 37 CFR 1.53(d), and RCEs.

PTO Form 2038 should be used when authorizing payment by credit card; this form is maintained separate from the file to ensure confidentiality.

The USPTO has recently installed server software that enables us to automatically receive facsimile transmissions and route them to the appropriate groups. No special equipment is needed by our customers to use this system other than a regular facsimile machine. Each Technology Center has its own facsimile numbers associated with our server for Official replies to non-final Office actions and for Official replies to final Office actions. In addition, each Technology Center has a Customer Service Center on our server system, and can answer any general application status questions you might have, can provide Examiner information, and answer paper queries.

The fax phone numbers for the organization where this application or proceeding is assigned are 703-872-9318 or 703-308-7722 for regular communications and 703-872-9319 or 703-308-7722 for After Final communications.

Tech Center 2800 Customer Service is at 703-306-3329 or 703-872-9317. Any inquiry of a general nature or relating to the status of this application or proceeding can also be directed to the receptionist whose telephone number is 703-308-0956.
